

ABEM

RAMAG A New software for Wadi users.

**RAMAG introduces the functionality of a Windows platform.
Check the features outlined below:**

- **Compatible with all Windows operating systems, including XP.**
- **Direct access to the Windows print managers offers both landscape and portrait orientation and other print set up functions.**
- **Menu driven data download module for transferring field data from a Wadi to a PC. The raw data is displayed on screen during the transfer.**
- **Current density cross sections can be produced in colour or grey scale down to a maximum depth of 100 meters.**
- **Survey planning module is provided with a world wide VLF transmitter data base.**
- **Line graphs of raw or filtered data can be completely customized with on-screen editing capabilities, or let a built-in set of default parameters produce a good looking graph automatically.**
